SOC 2 Certification in Saudi Arabia is an auditing procedure that ensures your service providers securely manage your data to protect the interests of your organization and the privacy of its clients. For security-conscious businesses, service organization control 2 is compliance is a minimal requirement when considering a SaaS provider. The SOC 2 is developed by the American Institute of CPAs (AICPA), SOC 2 defines criteria for managing customer data based on five “trust service principles” security, availability, processing integrity, confidentiality and privacy.

Security: The SOC 2 security principle refers to protection of system resources against unauthorized access. SOC 2 it accesses controls help prevent potential system abuse, theft or unauthorized removal of data, misuse of software, and improper alteration or disclosure of information.
Availability: The accessibility of the system, products or services as stipulated by a contract or service level agreement and as such, the minimum acceptable performance level for system availability is set by both parties.

Processing integrity: SOC 2 in Saudi Arabia is the principle addresses whether or not a system achieves its purpose. Accordingly, data processing must be complete, valid, accurate, timely and authorized. The processing integrity does not necessarily imply data integrity. SOC 2 Certification is data contains errors prior to being input into the system, detecting them is not usually the responsibility of the processing entity.
Confidentiality: The SOC 2 Certification in Riyadh is data is considered confidential if its access and disclosure is restricted to a specified set of persons or organizations. And it is an important control for protecting confidentiality during transmission, network and application firewalls, together with rigorous access controls, can be used to safeguard information being processed or stored on computer systems.
Privacy: The system's collection, use, retention, disclosure and disposal of personal information in conformity with an organization's privacy notice, as well as with criteria set forth in the AICPA's generally accepted privacy principles.
Who needs a SOC 2 Certification Services in Saudi Arabia?
SOC 2 Consultants in Saudi Arabia is Service organizations that do not materially impact the ICFR of their user organizations, but do provide key services to user organizations may need a SOC 2. Many companies outsource IT infrastructure to service organizations, such as data centers and cloud hosting providers. SOC 2 Certification in Al Khobar to demonstrate they have certain controls in place to mitigate security, availability, confidentiality, processing integrity, or privacy risks.
